We offer you the facilities of test plots of the newest Peach, Apple and Sweet Cherry varieties. Our orchards are of great help in enabling us to know the problems of the growers. We test under orchard conditions many new varieties and determine their value before we offer them for sale. We are small growers and because of this we keep in close touch with all operations. This, we believe, gives our customers a great advantage.

If you prefer, we do custom budding from trees of your choice without extra cost to you.

We grow and sell our own trees, if our supply becomes exhausted, we buy for our customers when they request us to do so.

GUARANTEE

We guarantee to furnish healthy, vigorous, well-grown trees or plants. We cannot be responsible for continued growth after stock has been planted on grower's premises because such factors as faulty planting, poor soil conditions, lack of moisture, etc., are beyond our control.
